This diagram illustrates the exploded view of a mechanical assembly, likely a pump or motor component. The parts are numbered as follows:

- Top Section:** Includes a large circular component (1) with a central shaft (2) and a flange (34). A large circular cover (45) is shown above it. A small circular component (48) is shown to the left.
- Central Section:** Features a large circular component (9) with a central shaft (10) and a flange (11). A large circular cover (12) is shown below it. A small circular component (13) is shown to the right.
- Bottom Section:** Includes a large circular component (14) with a central shaft (15) and a flange (16). A large circular cover (17) is shown below it. A small circular component (18) is shown to the right.
- Other Components:** Various smaller parts are shown, including a large circular component (19) with a central shaft (20) and a flange (21), a large circular component (22-1A) with a central shaft (23) and a flange (24), a large circular component (25) with a central shaft (26) and a flange (27), a large circular component (28) with a central shaft (29) and a flange (30), a large circular component (31) with a central shaft (32) and a flange (33), a large circular component (34) with a central shaft (35) and a flange (36), a large circular component (37) with a central shaft (38) and a flange (39), a large circular component (40) with a central shaft (41) and a flange (42), a large circular component (43) with a central shaft (44) and a flange (45), a large circular component (46) with a central shaft (47) and a flange (48), a large circular component (49) with a central shaft (50) and a flange (51), a large circular component (52) with a central shaft (53) and a flange (54), a large circular component (55) with a central shaft (56) and a flange (57), a large circular component (58) with a central shaft (59) and a flange (60), a large circular component (61) with a central shaft (62) and a flange (63), a large circular component (64) with a central shaft (65) and a flange (66), a large circular component (67) with a central shaft (68) and a flange (69), a large circular component (70) with a central shaft (71) and a flange (72), a large circular component (73) with a central shaft (74) and a flange (75), a large circular component (76) with a central shaft (77) and a flange (78), a large circular component (79) with a central shaft (80) and a flange (81), a large circular component (82) with a central shaft (83) and a flange (84), a large circular component (85) with a central shaft (86) and a flange (87), a large circular component (88) with a central shaft (89) and a flange (90), a large circular component (91) with a central shaft (92) and a flange (93), a large circular component (94) with a central shaft (95) and a flange (96), a large circular component (97) with a central shaft (98) and a flange (99), a large circular component (100) with a central shaft (101) and a flange (102).
